Note by Pradeep Bhai / Hitesh (dated 9/3/2026):

Booking Situation

Booking temporarily STOPPED for new bookings. If previous customer comes who already booked:

- Explain: booking stopped because rates are fluctuating
- Try to convert → spot buy today
- If customer says "some amount today, remaining in 7 days" → that is also acceptable

Partial Payment Situation

- Customer buys but pays only 50-70% → rate locking + making charges confusion hogi
- Final clarity from management awaited
- If remaining amount stuck due to transaction limit → rate locking + making charges depend on time period + % paid
- Confirm with manager before committing
